To Whom It May Concern:

Graeme Elliott is a Senior Developer on the VideoWave team at MGI, a subsidiary of the Roxio Division of Sonic Solutions. Graeme has been working for MGI since 1996 and has been a cornerstone of our development team since that time.

Over the years, Graeme has worked on many portions of our application, ranging from the core architecture, to the application layer. Most recently, he has worked on the Audio Editing, Text Editing, Cinemagic and Slideshow modules. Graeme has always been passionate about refining our application workflow to remove inefficiencies or annoyances that would get in the user's way.

Graeme has mentored several members of the team, and often played the role of the deputy team-lead. Graeme often stepped in to alleviate the pressure in triaging bugs, and played a key role in eliminating the noise as we brought our off-shore QA staff up-to-speed on the project.

Prior to the closing of the Richmond Hill office, I had looked forward to leveraging Graeme's experience as we designed and built the next generation of our video editing software. I am sure that Graeme would be a great asset to your team.

If you would like additional information about Graeme, you can telephone me at (416) 500-5679.

Sincerely,

Dan Staheli
Director of Video Product Engineering
Roxio Division, Sonic Solutions
