To Whom It May Concern:

Graeme Elliott is a Senior Developer on the VideoWave team at MGI, a subsidiary of the Roxio Division of Sonic Solutions. Graeme has been working for MGI since 1996 and has been a key member of our development team since that time.

Over the years Graeme worked on various components of our products and used his vast experience and thoroughness to improve the functionality and performance of our core architecture, as well as the application layer. Graeme meets the project deadlines and estimates (as determined by the project management team); also, it is to be noted that in several instances Graeme has delivered ahead of the schedule, by showing a high determination and motivation to complete his tasks and duties before the deadline.

Graeme focuses constantly on delivering high quality code, well unit tested; evidence of this is the unit tests plans that he uses for either his project or bug fixes work. Graeme's great communication skills and attention to detail were often used to improve the documentation of our products. Also, he not only focuses on the issues from a technical standpoint, but also, from a business-related view. He took the extra steps to work with product management and improve the workflow of our products. He also took a lead role for SlideShow and Cinemagic task assistant applications.

I would work with Graeme again anytime, and I am sure that he would be a great asset to your team.

If you would like additional information about Graeme, you can contact me at (416) 873-1105.

Sincerely,

Oana Popescu  
Technical Team Lead, VideoWave  
Roxio Division, Sonic Solutions
